## Ring Sizer

To measure your toe or finger for the proper size, simply place a string around your toe or finger as shown in Fig. 1. Allow enough room for comfort and any normal swelling. On a toe, the measured size should not allow the string to come over the end of the toe. Generally, if a ring can go over the end of your toe without lubricating it, the ring will be too loose.

Rings that are to be worn on the knuckle must fit somewhat tightly so that the rings are held securely in place.

After you are satisfied with the fit, mark the strings where they cross as shown in Fig. 2. Using the printed Sizing Form, place the string as shown in Fig. 3, with one mark on the zero and the other mark on the sizing numbers and read the size. Wherever the second mark falls is the ring size. If it falls between two numbers, this will be a half size, i.e. 3 1/2, or 4 1/2.
